We respect the history of places and operate on the premise that you work on the future based on an understanding of the past. Looking back to a time in America when urban places were the heart of the community, we bring our vision forward in a new and compelling context, uncovering each site's unique narrative and authenticity. We are responsible for the planning of many national award-winning urban neighborhoods across the country, including Santa Fe, Row in San Jose, CA, Rockville Town Square in Rockville, MD, and Blue Square in West Hartford, CT. Our strengths in master planning and design contribute to the success of these places where our collaboration on the architectural, design, urban planning, design management, physical site analysis, placemaking and brand branding strategies create communities where people live prosperously. Stemming from a rich DNA of experience, we are able to bring a new mark in the fabric of our world's great cities, we pull from the historic fibers and character of each neighborhood knitting together disparate parts as if a whole make it cohesive, connected, and vibrant.

"This simple principle always stands true: if human biochemistry is even slightly impaired, true health and longevity will never be achieved."

— Dr. Harrison

| Dr. Harrison's Story | CREDENTIALS

Dr. Glenn Harrison, DC, BSC, is board certified in Chiropractic with advanced training in functional and nutritional medicine and a passion for helping his patients reclaim their health.

He holds a Doctorate of Chiropractic Medicine from Northwestern Health Science University in 1991 and a Bachelor of Science degree from the University of Maryland with a major in integrative chemistry. He holds multiple post graduate certifications in the fields of functional embryology, functional immunology, functional blood chemistry and clinical nutrition.

| Why Dr. Harrison Founded the CFM |

"I was frustrated with seeing the same symptoms over and over in my clients, such as autoimmunity, weight gain, hormonal imbalances and blood sugar disorders of people who the medical system failed. They needed and deserved the care that was able to identify a system, structure and an education to take care of themselves and prevent these from falling into the medical system of excessive drugs and surgeries."

The MISSION and PURPOSE of CFM:

"To empower and create health independence through knowledge, guidance and mentorship using the tools of science, nutrition and lifestyle modifications."

NDC
NATIONAL DENTAL CONSULTING

Welcome to National Dental Consulting. We are a Management and Marketing Consulting firm for dentists and healthcare professionals.

Established over 25 years ago, our mission is to enhance and financially build healthcare practices nationwide. Our CEO and head consultant, Dr. Joseph DeFaria, is a practicing dentist who maintains a successful dental practice and continues to treat patients. Therefore, he has not lost the integral connections and understandings of the day to day problems facing doctors. We believe this is what makes National Dental Consulting the market leader in dental consulting.

"My core belief is that the application of business principles, the understanding of time management and controlled overhead is the foundation for every successful business. I have been fortunate to study with some of the finest business consultants today. Understanding the strong business principles of marketing opens avenues of growth not seen in my 40 years of practice. Most importantly, I have learned from my patients. They always let me know WHAT WORKS and WHAT DOES NOT."

Dr. Joseph DeFaria

Accelerated Power Marketing will take your practice to the next level; increasing your profitability by maximizing your return of marketing dollars. This program will be an investment in your future, both financially and professionally.

SYSTEM RELIABILITY & PERFORMANCE

REGULAR INSPECTIONS ENSURE THAT COMPONENTS ARE OPERATING SAFELY AND EFFICIENTLY!

- COMBUSTION ANALYSIS of the flue gases check for "clean/dirty burn" which indicates a dirty heat exchanger, improper fuel/air mix, venting issue.
- DIGITAL CAMERA inspection of the heat exchanger can indicate fuel/air mix problems or combustion/venting issues.
- SYSTEM FLUID ANALYSIS indicate presence of corrosion/scale occurring in the system. 3mm of scale on a heat exchanger reduces heat transfer by 7% in a high efficiency boiler. On site analysis included with all inspections and lab testing available for heavily soiled systems.
- DESCALING AND "SYSTEM FLUID TUNING" services utilize chemical cleaning with a "power flush", magnetic filtration of ferrous debris, fill with De-ionized(DI) and ph adjust as per VDI 2035.
